

Sample Website Audit and Competitive Analysis

Thank you for taking the time to review this website audit and competitive comparisons report. In this report, we take a broad look at your website and how it stacks up against competing websites in your industry. We hope you gain a lot of insight from our findings and find it easier to move forward confidently with a well-informed plan of action.

Audience Overlap

In addition to the three competitors you gave us initially, we reviewed some other biopharma sites with a similar audience overlap to give us an even broader view of the playing field.

Competitors

Bristol-Meyer Squibb – bms.com

Boehringer Ingelheim – boehringer-ingelheim.com

Eli Lilly – lily.com

Amgen – amgen.com

Throughout this audit, we compare your site's statistics to these sites to give you an unbiased look at a level playing field.

Competitive Analysis

A seasonal competitive analysis is an important part of evaluating your site's performance. It allows you to view your successes in the context of your unique competitive set. And it highlights opportunities for improvement based on the performance of your peers.

Your Competitors

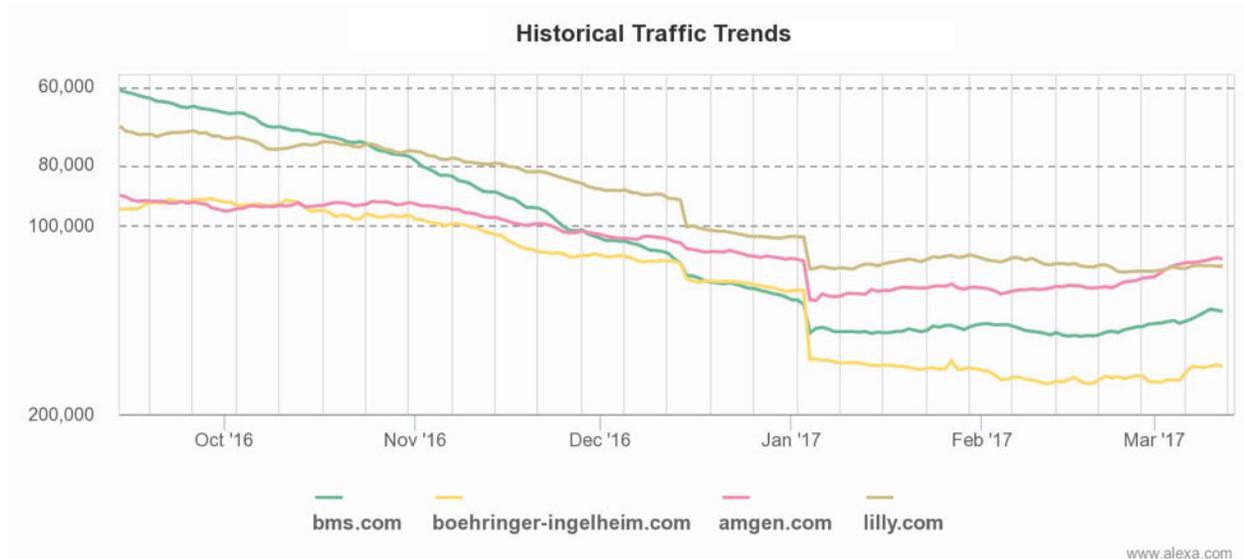

This competitive analysis example will give you a peek into just who is leading the pack in your industry and why.

There are 3 major categories that we include in this sample competitive analysis report.

Full audits include additional research and insight into why data is trending one way or another.

Benchmarking Website Traffic

Benchmarking your website traffic against others' helps you understand how good is good enough. Because success varies depending on the industry, type of site, or campaign, a clear understanding of industry norms ensures your perception of success is realistic.

Through the Historical Traffic Trends, you can see that Amgen and Eli Lilly lead the pack after an unusual dip in traffic rankings during January 2017.

Full audits include additional research and insight into outlying trends

Bounce Rate

Bounce rate is a measure of quality and engagement on your website. It represents the percentage of users that only view *one page* upon entering your site.

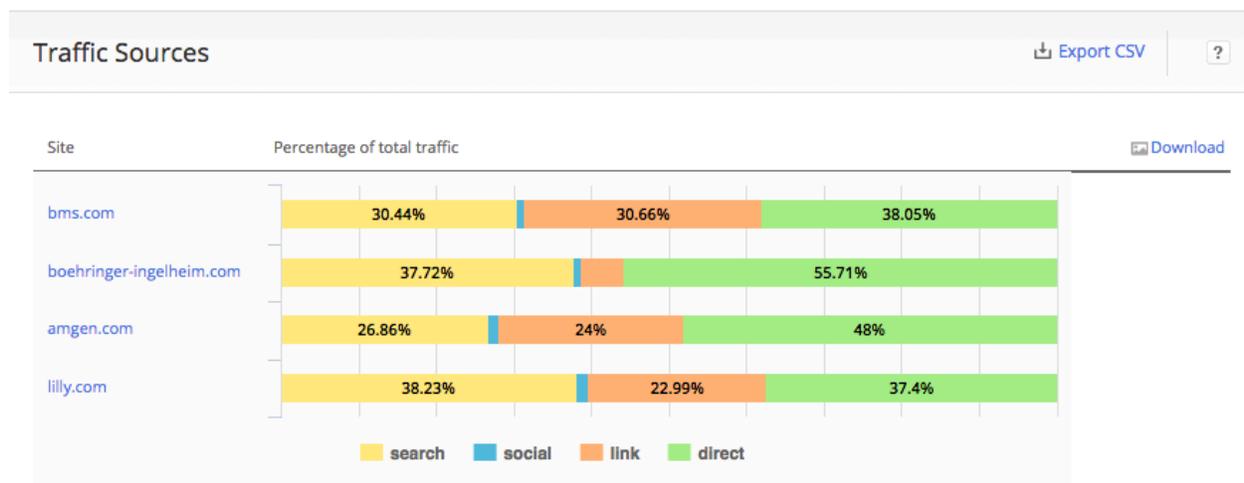

If your site's bounce rate is high, this could indicate a lack of relevant content for the audience you're trying to attract. Or it might mean you are not attracting the right audience. So they land on your page, realize your site isn't for them, and they bounce.

Bounce rate averages vary depending on the industry, so it's important to know what's normal and what's not.

Site	Pageviews/User	Bounce Rate
bms.com	3.00 ▼ 17.45%	37.50% ▲ 16.00%
boehringer-ingelhei...	2.60 ▼ 8.80%	48.30% ▼ 6.00%
amgen.com	2.60 ▲ 7.00%	52.60% ▼ 4.00%
lilly.com	2.60 ▲ 2.00%	36.20% ▼ 11.00%

Comparing Traffic Sources

Knowing how your visitors find you (where they come from) helps you know where to focus your efforts. It also helps you identify successful strategies that are working for your competitors.

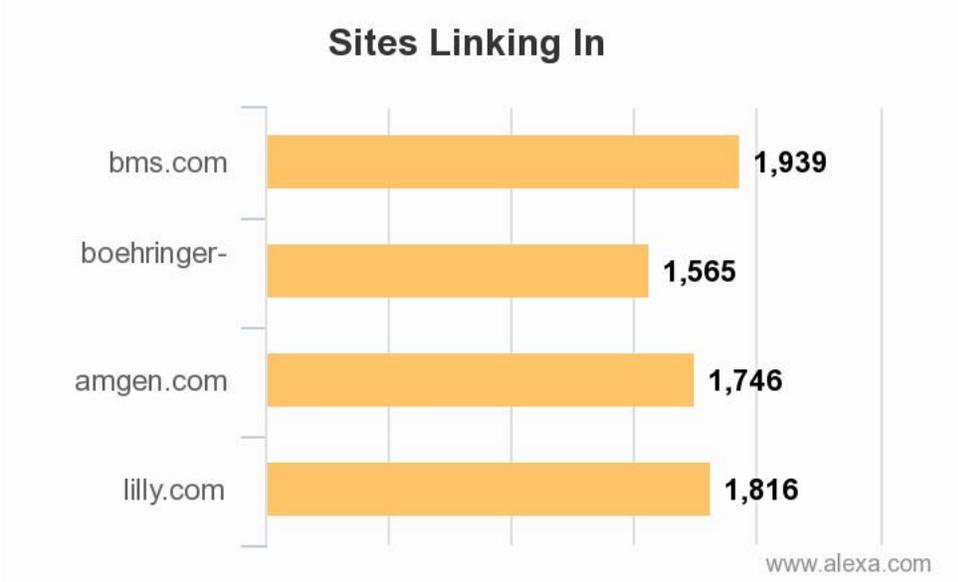

You'll notice the majority of the traffic to these sites is split between search and direct traffic. Because many biotech company websites in this space are geared toward attracting consumers, we can assume that a disproportionate amount of incoming search traffic is normal.

While it is normal to see relatively little traffic from social with many pharma companies, this could indicate an opportunity to capture traffic from social networks when other companies are not focused on this sector.

Full audits include additional research into untapped sectors

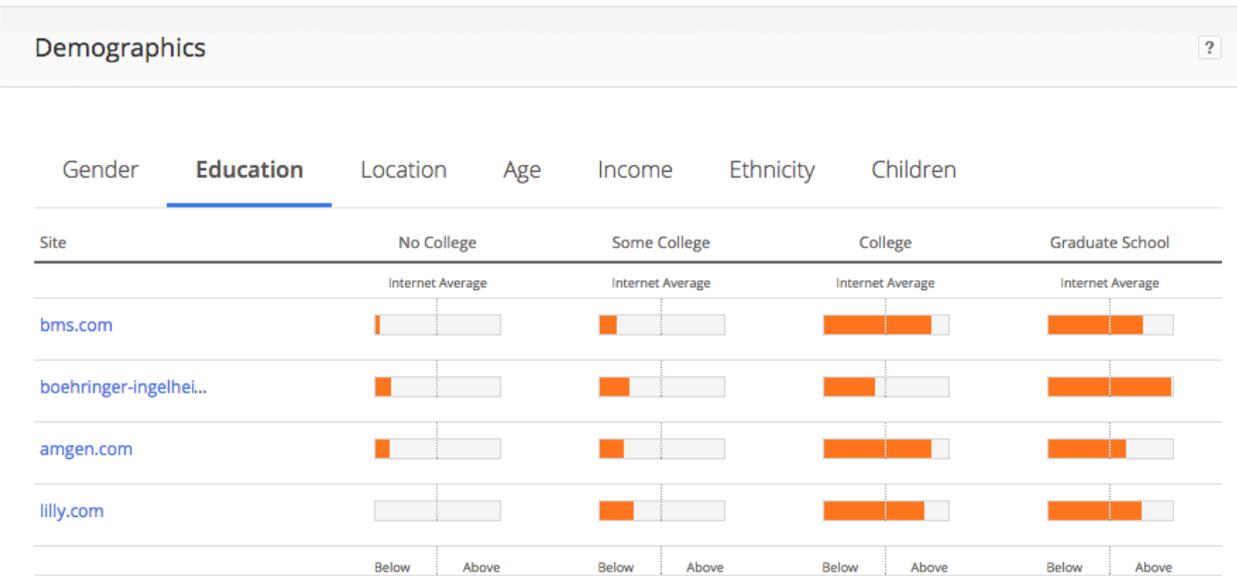

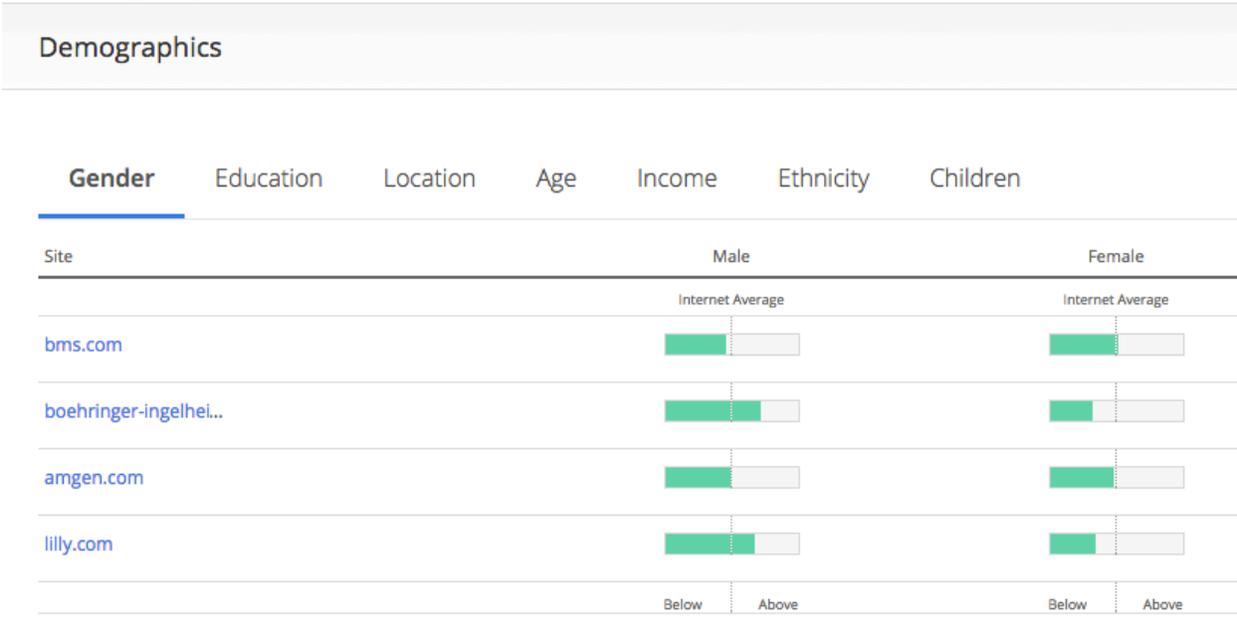

Incoming Links

Our reputation matrix above shows that no site leads predominantly in the number of sites linking in, but all competitors appear to have successful incoming link campaigns. **This may be a very good opportunity to invest in unique content, produce more press releases and/or position the company as a thought leader in this category.**

Full audits include insight into potentially untapped sources of incoming links.

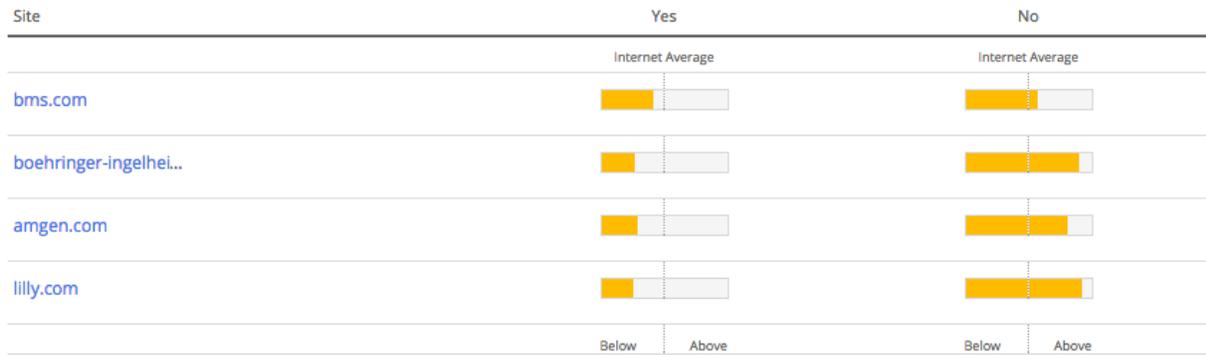

Demographics

Demographics

Gender Education Location Age Income Ethnicity **Children**

Full audits include additional insight into demographic trends
